CLUJ-NAPOCA, ROMANIA · CET	REMOTE — 4+ HRS DAILY OVERLAP WITH US EASTERN	INDEPENDENT CONTRACTOR
----------------------------	---	------------------------

Senior frontend engineer, **8+ years specialized in Angular**, shipping production systems across regulated, high-stakes industries — automotive, banking, regulatory compliance, and high-traffic consumer platforms. I architect multi-brand and micro-frontend platforms — white-label theming, Module Federation, Nx monorepos — and have independently designed, built, shipped, and operated three of my own SaaS products, one serving ~250 daily active users. Equally comfortable owning a feature end-to-end or being the sole frontend engineer on a mission-critical app, working directly with stakeholders in Agile teams. Engaging through my own Romanian company — no payroll, benefits, or visa overhead.

TECHNICAL SKILLS

Languages	TypeScript · JavaScript (ES2023) · HTML5 · CSS3 · SCSS
Frameworks	Angular (8–18) · React · Next.js · Node.js · NestJS
Architecture	NgRx (Store, Effects, Entity) · RxJS · micro-frontends · Module Federation · Nx monorepos · white-label / multi-brand · design systems & tokens · Web Components · SSR (Angular Universal)
UI & Styling	Angular Material · Tailwind · Bootstrap · Ag-Grid · Highcharts · ngx-datatable · Figma · responsive · accessibility (WCAG) · Storybook · PWA · i18n
Testing	Jasmine · Karma · Jest · Playwright · unit, integration & e2e · code review
Tooling	Git · CI/CD · GitHub CLI · Azure DevOps · Agile/Scrum · performance optimization
Backend & Data	REST APIs · GraphQL · Firebase · Supabase · PostgreSQL

EXPERIENCE

Independent Frontend Engineer — Contract Next Level Tech (own company) — Cluj-Napoca Senior Angular contractor delivering for clients across automotive, banking, compliance, and regulated consumer platforms — concurrent and sequential Agile/Scrum engagements.	2020 — PRESENT
Confidential Client — white-label consumer platform · regulated industry (NDA) Angular · TypeScript · NgRx (Store, Effects, Entity) · RxJS · Angular Material · SCSS · PWA · i18n - Develop the core frontend of a white-label consumer platform serving 10 brands across regulated European markets, in a modular Angular/NgRx architecture built for multi-brand scalability. - Built a custom theming system (color palettes, typography, layout) enabling rapid onboarding of new brands with minimal code changes, plus shared component libraries reused across brand deployments. - Own key feature areas — user-facing pages, gamification, payment flows — managing complex real-time state with NgRx Store/Effects/Entity; delivered responsive, mobile-first UI with PWA, i18n and Jasmine/Karma tests. - Built an automated pre-PR Angular code-review pipeline (Claude Code + GitHub CLI) that flags anti-patterns before human review, cutting review turnaround by ~80%.	JUN 2025 — PRESENT
Exadel — Compliance Cockpit — regulatory compliance Angular 18 · NgRx · RxJS · Nx · Module Federation · Highcharts · SCSS · i18next · NestJS - Built the Campaigns module frontend of an enterprise regulatory-compliance platform serving organizations across Europe, as an Angular 18 micro-frontend with Module Federation in an Nx monorepo. - Designed a multi-step campaign wizard for compliance teams to create, schedule and manage employee awareness and training campaigns, with a recipient-management system for employee/group targeting. - Built interactive dashboards with real-time completion tracking (Highcharts), implemented i18n for campaign content, and contributed to a shared Web Components + Angular library documented in Storybook.	MAR — SEP 2025

MTD Technology — automotive, vehicle software updates

MAR 2024 — MAY 2025

Angular · TypeScript · Ag-Grid · ngx-datatable · Angular Material · Bootstrap

- Sole frontend engineer on a mission-critical software-update management tool used across five Volkswagen Group brands — Volkswagen, Seat, Porsche, Cupra, Bentley — owning the entire frontend end-to-end.
- Built data-dense UI with Ag-Grid, ngx-datatable, Angular Material and Bootstrap; worked closely with backend developers on data flow and translated stakeholder requirements directly into shipped improvements.
- Led the full frontend handover: defined the role, interviewed and selected the incoming developer, and onboarded them for zero-disruption continuity.

SHE Group — financial / tax reporting

MAY 2024 — MAR 2025

Angular · Angular Material · Nx · SCSS · TypeScript

- Delivered a solution for managing tax reports, integrating closely with backend teams for seamless data flow.
- Used Nx to manage multiple frontend applications in a monorepo; designed reusable Angular Material + vanilla SCSS components that fed a code-generation tool, streamlining development across teams.
- Led client meetings to gather requirements and keep delivery aligned with business needs.

Be | Shaping the Future — banking

JUN 2023 — MAR 2024

Angular 17 · Angular Material · Bootstrap 5

- Built financial applications for a leading Romanian bank, including a financial-planning tool and a drag-and-drop PDF generator that streamlined report creation for banking and investment professionals.
- Developed modern, responsive UIs and partnered with backend and business teams to set milestones and ship within strict deadlines.

Wirtek Romania — green energy

JUN 2022 — JUN 2023

Angular · TypeScript · SCSS · Azure DevOps

- Led frontend development of a green-energy application within a 10-person team, driving feature delivery and client satisfaction.
- Integrated closely with backend via Azure DevOps to troubleshoot and resolve issues, and mentored junior developers.

Fabrit Global — sports arena booking

NOV 2021 — NOV 2022

- Built and maintained the frontend of a booking platform (Angular 8/5, Azure DevOps), optimizing performance across mobile and desktop and shipping new features and stability improvements.

P4B Group — Angular 12 product

MAR 2020 — NOV 2021

- Led the frontend of an Angular 12 product with a PHP backend, coordinating two other frontend developers and enforcing code consistency, performance and clean integration.

FOUNDER & OWN PRODUCTS — NEXT LEVEL TECH

Designed, built, shipped and operated solo — proof of end-to-end ownership. Live demos at [sergiu.tigan.dev](#).

AI FITNESS PLATFORM

PULSE

Next.js / Firebase. Trainer–client workflows, AI-driven workout generation, 70+ exercise library, white-label branding.

~250 DAILY ACTIVE USERS

DOBBY

Angular / Node / Supabase food-ordering platform. Migrated SQLite → PostgreSQL to support growth, with real-time order updates.
[dobby.tigan.dev](#)

MULTI-TENANT PRODUCTION PLATFORM

HORAE

Next.js / NestJS / PostgreSQL. Recipes, FIFO stock, orders — one API serving web, iOS and Android clients, white-label per tenant.
[horae.ca](#)

EARLIER EXPERIENCE

msg systems Romania — Junior Frontend Developer

JAN 2017 — MAR 2020

- Built a medical/insurance application for AOK Plus (Angular 8, SCSS, SAP Spartacus); led the migration to the production version of Spartacus, improved load times and ensured cross-browser compatibility.

Draexlmaier Group — Backend Developer Intern, Germany

NOV 2015 — DEC 2016

- SAP ABAP training; built front- and back-end features for a retail app on S/4HANA, SAPUI5 and SAP Fiori.

EDUCATION

B.Sc. Informatics 2011 — 2014
Universitatea Politehnica din Timișoara
